

## INDEX TO VOL. XXV.

**A**BSORPTION, fat, xxviii.

—, peritoneal, xv.

Acapnia, 310, 385.

Alcohol, effect on metabolism, xi.

Amino-acids, a source of sugar, xix.

Ammonia, elimination, 214.

—, metabolism after thyroidectomy, 403.

Anæsthesia, apnoea vera in, xiii.

Antibodies, concentration in body fluids, 202.

Apnoea, after excessive respiration, 310.

Apnoea vera, in anæsthesia, xiii.

AUER, J. The effect of severing the vagi or the splanchnics or both upon gastric motility in rabbits, 334.

AUER, J., and S. J. MELTZER. The influence of calcium upon the pupil and the pupillomotor fibres of the sympathetic nerve, 43.

**B**ALDWIN, W. M. The relation of the pancreas to sugar metabolism, xxi.

Barium, antagonism to magnesium, xvii.

—, elimination, 142.

BECHT, F. C. See GREER and BECHT, 202.

BENEDICT, S. R. See MENDEL and BENEDICT, 1, 23.

Blood pressure, in sheep, 433, xvii.

Blood, venous, affected by exercise, xxiv.

BUNZEL, H. H. See WOODRUFF and BUNZEL, 190.

**C**ALCIUM, excretion, 23.

—, influence on nerves of pupil, 43.

Cambridge reaction, xiv.

CARLSON, A. J. See DAVIS and CARLSON, 173.

CARLSON, A. J. See HEKTOEN and CARLSON, xix.

CARLSON, A. J., and CLARA JACOBSON. The depression of the ammonia-destroying power of the liver after complete thyroidectomy, 403.

CARPENTER, T. M., and J. R. MURLIN. The energy metabolism of parturient women, xxvi.

CARREL, A., G. M. MEYER, and P. A. LEVENE. The influence of the removal of fragments of the intestinal tract on the character of nitrogen metabolism. — II. The removal of the small intestines, 439.

Catalase, in echinoderm eggs, 199.

Circulation, peripheral flow varies with temperature, xviii.

**D**AVIS, B. F., and A. J. CARLSON. Contribution to the physiology of lymph. — IX. Notes on the leucocytes in the neck lymph, thoracic lymph, and blood of normal dogs, 173.

DOLLEY, D. H. The neurocytological reaction in muscular exertion. — I. Preliminary communication. The sequence of the immediate changes in the Purkinje cells, 151.

DRESBACH, M. Observations upon the blood pressure of the sheep, 433, xvii.

**E**GG, chemistry of yolk-platelets and pigment, 195.

—, echinoderm, fertilization affected by neutral salts, xxiii.

—, relation of catalase to fertilization, 199.

Eye, origin in vertebrates, 77.

Electrolytes, action on muscle and nerve, xxii.

ERLANGER, JOSEPH. Mammalian heart strips together with a theory of cardiac inhibition, xvi.

Exercise, effect on venous pressure, xxiv.

**F**AT, absorption, xxviii.

Ferments, affected by shaking, 81.

Ferment, glycogenolytic, 255.

Fishes, integumentary nerves of, 77.

FLEISHER, M. S., and L. LOEB. The absorption of fluid from the peritoneal cavity, xv.

GLYCOSURIA, distribution of ferment, 255.

GORHAM, L. W., and A. W. MORRISON.

The action of the proteins of blood upon the isolated mammalian heart, 419.

GREER, J. R., and F. C. BECHT. A study of the concentration of antibodies in the body fluids of normal and immune animals, 292.

HEART, action of blood proteins on, 419.

—, metabolism during inhibition, xxv.

—, rigor, related to vagus stimulation, 113.

—, theory of inhibition, xvi.

HERTOEN, L., and A. J. CARLSON. On the distribution of immune bodies in the body fluids of immune animals, xix.

HENDERSON, Y. Acapnia and shock. — IV. Fatal apnoea after excessive respiration, 310.

HENDERSON, Y. Acapnia and shock. — V. Failure of respiration after intense pain, 385.

HENDERSON, Y. An observation on the chemical regulation of respiration, xii.

HENDERSON, Y. See SCARBROUGH and HENDERSON, xiii.

HEWLETT, A. W. The effect of varying room temperatures upon the peripheral blood flow, xviii.

HILDITCH, W. W. See MENDEL and HILDITCH, xi.

HILDITCH, W. W. See UNDERHILL and HILDITCH, 66.

HOOKE, D. R. (with J. M. WOLFSOHN). The effect of exercise upon the venous pressure, xxiv.

HOSKINS, R. G. Congenital thyroidism: an experimental study of the thyroid in relation to other glands with internal secretion, xii.

IMMUNE bodies, distribution, xix.

Inhibition, cardiac, metabolism in, xxv.

—, cardiac, theory of, xvi.

Inorganic compounds, excretion, 1, 23.

Intestine, regeneration of nerve and muscle, 367.

—, removal of segments influences metabolism, 231, 439.

Ions, relation to toxicity, 190.

JACOBSON, C. See CARLSON and JACOBSON, 403.

JOSEPH, D. R., and S. J. MELTZER. The effect of subminimal stimulation of the pneumogastric nerves upon the onset of cardiac rigor, 113.

JOSEPH, D. R., and S. J. MELTZER. The mutual antagonistic life-saving action of barium and magnesium, — a demonstration, xvii.

KETRON, L. W. See WOLFSOHN and KETRON, xxv.

LEVENE, P. A., and G. M. MEYER. The elimination of total nitrogen, urea, and ammonia following the administration of some aminoacids, glycylglycine, and glycylglycine anhydride, 214.

LEVENE, P. A. See CARREL, MEYER, and LEVENE, 439.

LEVIN, I., D. D. MANSON, and P. A. LEVENE. The influence of the removal of segments of the gastrointestinal tract on the character of protein metabolism, 231.

LEVINE, P. A. See LEVIN, MANSON, and LEVINE, 231.

LILLIE, R. S. The action of isotonic solutions of neutral salts on unfertilized echinoderm eggs, xxiii.

LILLIE, R. S. The sensitizing and desensitizing action of various electrolytes on muscle and nerve, xxii.

Liver, ammonia-destroying power depressed by thyroidectomy, 403.

LOEB, L. See FLEISHER and LOEB, xv.

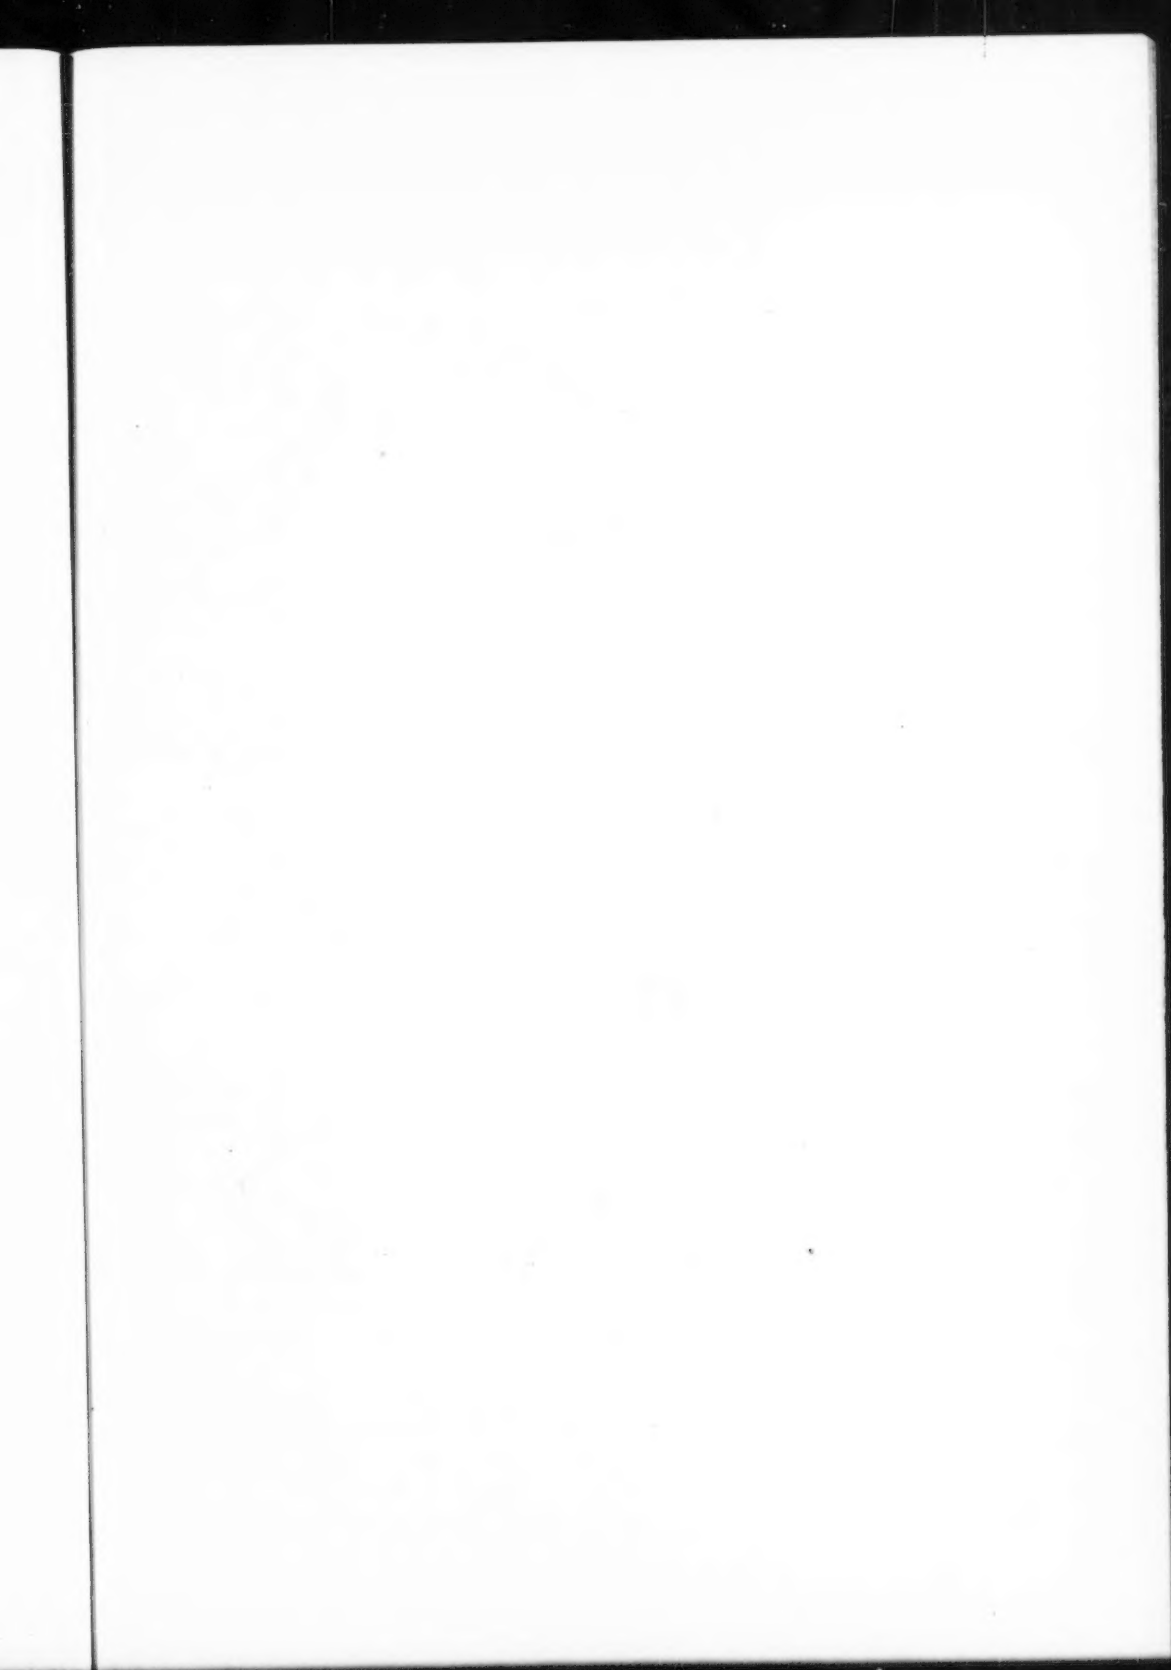

LUCKHARDT, A. B. Contributions to the physiology of lymph. — X. The comparative electrical conductivity of lymph and serum of the same animal, and its bearing on theories of lymph formation, 345.

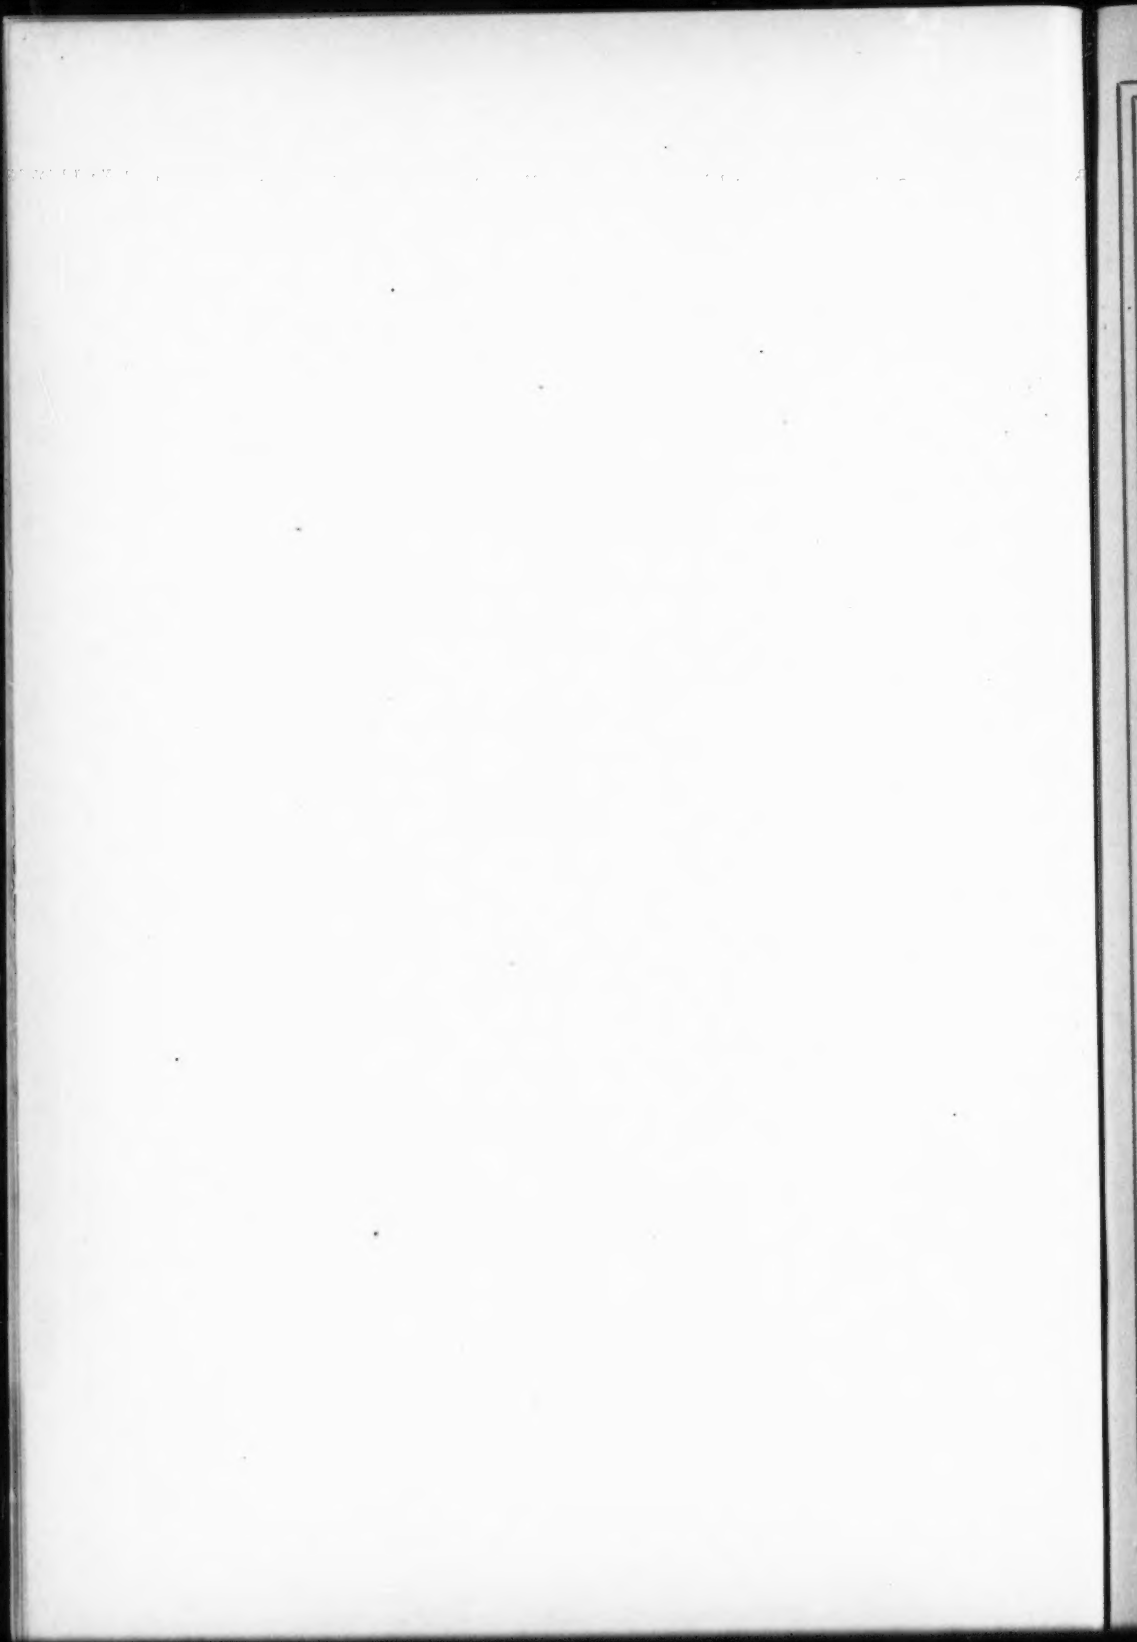

LUSK, G. See RINGER and LUSK, xix.

LUSKY, H. O. Contributions to the physiology of lymph. — XI. The fractional coagulation of lymph, 354.

- Lymph, conductivity related to formation of, 345.  
 —, fractional coagulation, 354.  
 —, leucocytes in, 173.  
 LYON, E. P. The catalase of echinoderm eggs before and after fertilization, 199.
- MACLEOD, J. J. R., and R. G. PEARCE.** Studies in experimental glycosuria. — V. The distribution of glycogenolytic ferment in the animal body, especially of the dog, 255.  
 Magnesium, antagonism to barium, xvii.  
 —, excretion, i.  
 MANSON, D. D. See LEVIN, MANSON, and LEVINE, 231.  
 MCCLENDON, J. F. On the nucleo-albumen in the yolk platelets of the frog's egg, with a note on the black pigment, 195.  
 MCCOLLUM, E. V. Nuclein synthesis in the animal body, 120.  
 MEEK, W. J. The regeneration of nerve and muscle of the small intestine, 367.  
 MELTZER, S. J. See AUER and MELTZER, 43.  
 MELTZER, S. J. See JOSEPH and MELTZER, 113, xvii.  
 MELTZER, S. J. See SHAKLEE and MELTZER, 81.  
 MENDEL, L. B., and S. R. BENEDICT. The paths of excretion for inorganic compounds. — IV. The excretion of magnesium, i.  
 MENDEL, L. B., and S. R. BENEDICT. The paths of excretion for inorganic compounds. — V. The excretion of calcium, 23.  
 MENDEL, L. B., and W. W. HILDITCH. The influence of alcohol upon metabolism, xi.  
 Metabolism, affected by aminoacids, glycylglycin and glycylglycin anhydrid, 214.  
 —, after removal of segments of the intestine, 231, 439.  
 —, heart, xxv.  
 —, influenced by alcohol, xi.  
 —, influence of salicylic acid, 34.  
 —, in parturient women, xxvi.  
 —, carbohydrate, affected by removal of thyroids, 66.  
 —, of sugar, from amino-acids, xix.  
 —, of sugar, related to pancreas, xxi.  
 MEYER, G. M. See CARREL, MEYER and LEVENE, 439.  
 MEYER, G. M. See LEVENE and MEYER, 214.  
 MEYER, G. M. The elimination of barium, 142.  
 MORRISON, A. W. See GORHAM and MORRISON, 419.  
 MURLIN, J. R. See CARPENTER and MURLIN, xxvi.  
 Muscle, action of electrolytes on, xxii.  
 —, neurocytological reaction in contraction, 151.  
 —, regeneration in intestine, 367.
- NERVE**, action of electrolytes on, xxii.  
 —, regeneration in intestine, 367.  
 —, vagus, in cardiac rigor, 113.  
 —, vagus, relation to cardiac inhibition, xxv.  
 Nerves, of stomach, 334.  
 —, integumentary, of fishes, 77.  
 —, to pupil, influenced by calcium, 43.  
 Nitrogen, excretion, 214.  
 Nuclein synthesis, 120.
- PAIN**, a cause of shock, 385.  
 Pancreas, function in sugar metabolism, xxi.  
 PARKER, G. H. The integumentary nerves of fishes as photoreceptors and their significance for the origin of the vertebrate eyes, 77.  
 PEARCE, R. G. See MACLEOD and PEARCE, 255.  
 Peritoneum, absorption from, xv.  
 Pigment, in frog's egg, 195.  
 Pregnancy, energy metabolism in, xxvi.  
 Proceedings of the American Physiological Society, ix.  
 Pupil, nerves influenced by calcium, 43.  
 Purkinje cells, changes in muscular exertion, 151.
- RESPIRATION**, chemical regulation, xii.  
 —, excessive, a cause of shock, 310.  
 Rigor, of heart, affected by vagus, 113.  
 RINGER, A. I., and G. LUSK. The production of sugar from aminoacids, xix.  
 ROCKWOOD, E. W. The influence of the isomers of salicylic acid on metabolism, 34.
- SALICYLIC** acid, influence on metabolism, 34.  
 SCARBROUGH, M. M., and Y. HENDERSON. Apnoea vera in anaesthesia, xiii.

- SHAKLEE, A. O., and S. J. MELTZER. The destructive effect of shaking upon the proteolytic ferments, 81.
- Shock, after excessive respiration, 310.
- , after intense pain, 385.
- SNYDER, C. D. Why do temperature coefficients of physiological processes increase for the lower ranges and decrease for the higher ranges of temperature, xxvii.
- Stomach, motility related to vagi and splanchnic nerves, 334.
- STOOKEY, L. B. A possible significance of the Cammidge reaction, xiv.
- Sugar, production from aminoacids, xix.
- Synthesis, of nuclein, 120.
- TEMPERATURE, coefficients at different temperatures, xxvii.
- Thyroidectomy, relation to increase in ammonia, 403.
- Thyroidism, congenital, xii.
- Thyroids, removal affects carbohydrate metabolism, 66.
- Toxicity of salts and acids, 190.
- UNDERHILL, F. P., and W. W. HILDITCH. Certain aspects of carbohydrate metabolism in relation to the complete removal of the thyroids and partial parathyroidectomy, 66.
- Urea, elimination, 214.
- VAGUS nerve, affects cardiac rigor, 113.
- WHITEHEAD, R. H. The absorption of fat stained by Sudan III, xxviii.
- WOLFSOHN, J. M., and L. W. KETRON. The gaseous metabolism of the dog's heart during vagus inhibition, xxv.
- WOLFSOHN, J. M. See HOOKER and WOLFSOHN, xxiv.
- WOODRUFF, L. L., and H. H. BUNZEL. The relative toxicity of various salts and acids toward paramecium, 190.

# THE AMERICAN JOURNAL OF PHYSIOLOGY

EDITED FOR  
The American Physiological Society

## CONTENTS

THE DEPRESSION OF THE AMMONIA-DESTROYING POWER OF THE LIVER AFTER COMPLETE THYROIDECTOMY. <i>By A. J. Carlson and Clara Jacobson</i> . . . . .	403
THE ACTION OF THE PROTEINS OF BLOOD UPON THE ISOLATED MAMMALIAN HEART. <i>By L. W. Gorham and A. W. Morrison</i> . .	419
OBSERVATIONS UPON THE BLOOD PRESSURE OF THE SHEEP. <i>By M. Dresbach</i> . . . . .	433
THE INFLUENCE OF THE REMOVAL OF FRAGMENTS OF THE INTESTINAL TRACT ON THE CHARACTER OF NITROGEN METABOLISM.—II. THE REMOVAL OF THE SMALL INTESTINES. <i>By A. Carrel, G. M. Meyer, and P. A. Levene</i> . . . . .	439
PROCEEDINGS OF THE AMERICAN PHYSIOLOGICAL SOCIETY. . . . .	ix

VOL. XXV.—No. VII.

Issued March 1, 1910

BOSTON, U.S.A.

1910

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. Each volume will contain about five hundred pages. The price of one volume sent postage free to subscribers in the United States and Canada is five dollars; to subscribers in other countries, five dollars and twenty-five cents. The price of Volumes One, Two, and Three will be six dollars to domestic subscribers, and six dollars and twenty-five cents to foreign subscribers. All subscriptions are payable in advance.

---

Subscriptions, manuscript, and all other communications should be sent to THE AMERICAN JOURNAL OF PHYSIOLOGY, Box 127, Back Bay Post Office, Boston, Mass., U.S.A.

---

Contributors will receive fifty copies of their papers free; additional copies may be obtained at cost.
